## About Me

---

Bachelor's student in Computer Engineering at Islamic Azad University, Rasht (Pol-e-Taleshan branch), and a junior full-stack engineer with strong skills in Python and a deep passion for robotics and computer vision. Experienced in building web applications, interactive UIs, and database-driven platforms. Currently expanding expertise into real-world perception systems and intelligent automation. Eager to contribute at the intersection of software engineering, robot intelligence, and practical usability

## Education

---

**BSc   Islamic Azad University, Rasht Branch**, Computer Engineering Sept 2022 – Feb 2026

- Current GPA: 3.1/4.0
- Selected Coursework: Databases, AI Foundations, Full-Stack Web Application

## Selected Publications

---

**AI for Human Motion: Video-Based Human Activity Recognition (HAR)** June 2025  
**Pedram Navard**, Maede Mehdinejad, Hossein Azgomi,  
*Arxiv (under preparation)*

Developed a video-based Human Activity Recognition (HAR) system leveraging deep learning to analyze and classify human motion from raw video data, focusing on robust feature extraction, temporal modeling, and real-world applicability in areas such as healthcare monitoring, security, and human-computer interaction.

## Experience

---

**Freelance Frontend Developer** Karlancer.com  
2023 – Present

- Developed 10+ responsive web applications using React.js and JavaScript.
- Created dynamic WordPress CMS themes and custom plugins for clients.
- Integrated GSAP for highly interactive UI animations.
- Designed SQL database architectures to support web applications.

**Web Full Stack Lecturer, Iran Technical & Vocational Training Organization** Gilan, Iran  
2023 – Present

- full stack web development including HTML, CSS, JavaScript, React.js, and PHP.
- Developing dynamic web applications and database integration.
- Collaborated with peers on learning modules focused on real-world applications.

## Selected Projects

---

**E-Commerce Platform with React & Firebase** Iran Open Source Hackathon  
2024

- Built a fully responsive SPA with Redux state management and Firebase authentication.
- Integrated Stripe API for test-mode payments.
- Reduced page load time by 30% via code-splitting and lazy loading.

**Custom WordPress CMS for Educational Blog** Independent

- Developed a custom SEO-optimized theme improving search rankings by 40%.
- Built a dynamic contact form plugin with email notifications.

## Skills

---

**Frontend:** HTML5, CSS3, Bootstrap, JavaScript, jQuery, React.js, Next.js, GSAP

**Backend:** PHP, WordPress, SQL Databases, Firebase

**Data Science:** Python, Scikit-learn, Pandas, Matplotlib, Seaborn

**Tools:** Git, Visual Studio, Redux Toolkit

**Learning:** Machine Learning, Deep Learning, Generative AI concepts

## Achievements & Extras

---

- IranWebFest Hackathon: Built real-time polling app with React/Node.js
- Solved 100+ LeetCode problems (Arrays, Dynamic Programming focus)
- Wrote technical articles on Medium about React Hooks best practices

## Additional Information

---

**Languages:** Persian (Native), English (Professional Working Proficiency, **TOEFL: 96/120 | Speaking : 25**)

**Interests:** Open source, Gen-AI, creative developer tools, applied ML/AI, ComfyUI extensions
