About Me

Bachelor's student in Computer Engineering at Islamic Azad University, Rasht (Pol-e-Taleshan branch), and a junior full-stack engineer with strong skills in Python and a deep passion for robotics and computer vision. Experienced in building web applications, interactive UIs, and database-driven platforms. Currently expanding expertise into real-world perception systems and intelligent automation. Eager to contribute at the intersection of software engineering, robot intelligence, and practical usability

Education

BSc Islamic Azad University, Rasht Branch, Computer Engineering Sept 2022 – Feb 2026

- Current GPA: 3.1/4.0
- Selected Coursework: Databases, AI Foundations, Full-Stack Web Application

Selected Publications

AI for Human Motion: Video-Based Human Activity Recognition (HAR) June 2025
Pedram Navard, Maede Mehdinejad, Hossein Azgomi,
Arxiv (under preparation)

Developed a video-based Human Activity Recognition (HAR) system leveraging deep learning to analyze and classify human motion from raw video data, focusing on robust feature extraction, temporal modeling, and real-world applicability in areas such as healthcare monitoring, security, and human-computer interaction.

Experience

Freelance Frontend Developer Karlancer.com
2023 – Present

- Developed 10+ responsive web applications using React.js and JavaScript.
- Created dynamic WordPress CMS themes and custom plugins for clients.
- Integrated GSAP for highly interactive UI animations.
- Designed SQL database architectures to support web applications.

Web Full Stack Lecturer, Iran Technical & Vocational Training Organization Gilan, Iran
2023 – Present

- full stack web development including HTML, CSS, JavaScript, React.js, and PHP.
- Developing dynamic web applications and database integration.
- Collaborated with peers on learning modules focused on real-world applications.

Selected Projects

E-Commerce Platform with React & Firebase Iran Open Source Hackathon
2024

- Built a fully responsive SPA with Redux state management and Firebase authentication.
- Integrated Stripe API for test-mode payments.
- Reduced page load time by 30% via code-splitting and lazy loading.

Custom WordPress CMS for Educational Blog Independent

- Developed a custom SEO-optimized theme improving search rankings by 40%.
- Built a dynamic contact form plugin with email notifications.

Skills

Frontend: HTML5, CSS3, Bootstrap, JavaScript, jQuery, React.js, Next.js, GSAP

Backend: PHP, WordPress, SQL Databases, Firebase

Data Science: Python, Scikit-learn, Pandas, Matplotlib, Seaborn

Tools: Git, Visual Studio, Redux Toolkit

Learning: Machine Learning, Deep Learning, Generative AI concepts

Achievements & Extras

- IranWebFest Hackathon: Built real-time polling app with React/Node.js
- Solved 100+ LeetCode problems (Arrays, Dynamic Programming focus)
- Wrote technical articles on Medium about React Hooks best practices

Additional Information

Languages: Persian (Native), English (Professional Working Proficiency, **TOEFL: 96/120 | Speaking : 25**)

Interests: Open source, Gen-AI, creative developer tools, applied ML/AI, ComfyUI extensions
